

# Aksel Nikolai Boutroue-Faret

Tlf: +47 472 32 199

E-mail: aksel.boutrouefaret@yahoo.com

Date of birth: 13/09/1998

Adress: O.Omdals vei 21 – 75, Kristiansand

## Key competencies:

- Dedicated and thorough person who doesn't give up until the task is complete.
- Versatile interest in computer science both in terms of digital art and programming.
- The ability to work in a group environment as well as individually.

## Education

August 2022 –  
ongoing

- **School:** Noroff, school of technology and digital media – Kristiansand  
**Study:** Vocational school - Front-end development

The studies involve front-end related subjects, mostly for UI or UX design, such as:

- Design
- HTML & CSS
- Javascript
- Javascript framework
- Workflow
- Web and communications technology
- Interaction design
- Industry knowledge
- Development platforms

This is where students prepare themselves for jobs related to the subject of their choosing. In my case, frontend-development is practiced in a way that prepares the students for what is expected in working life and how it can involve other fields such as graphic design or backend development.

We occasionally study backend development to gain better understanding, flexibility and skills needed to work independently.

**August 2018 – June 2021**

- **School:** Kristiania University - Oslo  
**Study:** Bachelor – Information Technology: Game programming

The subjects we went through include:

- Introduction to programming and graphic programming (uses Javascript as programming language)
- Creative web project (Javascript, HTML & CSS)
- Algorithms and data structures (Java)
- Agile project (strongly focused on project procedures and teamwork)

**Bachelor project:** The goal was to create a website based on the customer's wishes. I worked in a group and used Javascript, HTML and CSS along with UI & UX design techniques to complete the website project.

**August 2017 – May 2018**

- **School:** Sunnhordland folkeskole  
**Study:** Game art

The study focused on digital painting, with programming as an extra activity. Familiarized myself with programming languages such as C#, C++ and Javascript.

### Work experience:

**February 2022 – August 2022**

- **Working title:** Employee in «Meny» - Røa  
**Workplace:** Oslo
  - Worked in the «Meny» - Røa fresh product department. The main task was to serve customers in the store's meat, fish and hot food counter. Reference letter is sent separately.

**June 2018 – November 2021**

- **Working title:** Luado helper  
**Workplace:** Oslo
  - Link to website: <https://luado.no/page/om-luado>
  - Took various assignments such as IKEA-assembly, gardening, painting, etc.

**August 2015 – June 2016**

- **Working title:** French language homework helper  
**Workplace:** Hartvig Nissen videregående skole, Oslo
  - Helped with French from level 1 - 3 both for written and oral.

## Other:

- **Language:**
  - French and Norwegian (mother tongue), English (fluent)
- **Interests:**
  - Drawing, training, music and gaming
- **IT:**
  - Programming languages:  
Javascript, HTML, CSS, C#, C++, Java
  - Frameworks:  
Bootstrap (SASS), Tailwind, Typescript, React, Angular
  - Platforms:  
Visual Studio 2017/2019, Visual Studio Code, Unity
